

Ear Syringing at Oaklands Health Centre

The surgery will stop performing the above procedure from 1st February 2017.

We are encouraging patients to self-care and will provide written advice on how to self-manage this problem.

A leaflet for advice on how to self-manage this problem can be found on our website www.oaklandshealthcentre.co.uk. Or alternatively ask your clinician at your appointment.

If you have had previous ear surgery and you have an earwax blockage please be aware that you may require a referral to the ENT clinic at the hospital for suction removal as other methods of wax removal are **not** recommended.

If your symptoms persist for longer than 2 weeks please book in to see a Nurse Practitioner

Many thanks for your understanding.
Caroline Shamsee
Advanced Nurse Practitioner
